

Massive Pump Storage Powerplant Threatens Lower Bear River Reservoir and Mokelumne River

We need your help to prevent:

- A massive construction project that would cut off access including closing south shore campgrounds and boating ramps for over 4 years.
- Turn our wild and scenic rivers and lakes into a construction zone with road closures, big powerlines and road cuts, traffic control, noise and pollution.
- A permanent project that will cause drastic daily migration of the Lower Bear shoreline.
- Campgrounds will close and boating at Lower Bear will be impaired if Mokelumne Pumped Storage Proposal is approved.

Go to foothillconservancy.org/gg to learn more and to find out what you can do to help stop the pump storage powerplant proposal
